TANISHA BHATT

Backend Developer | Node.js · Python (FastAPI) · MongoDB · REST APIs

+91 73885 25564 | tanisha4bhatt@gmail.com | LinkedIn | GitHub | Ghaziabad, Uttar Pradesh

SUMMARY

Final-year CS student (CGPA 8.7) who designs secure REST APIs in Node.js and FastAPI on MongoDB: JWT authentication, role-based access, concurrency-safe data models, rate limiting and background processing. Backend developer intern, coordinator of a 45-member programming club, 250+ DSA problems solved.

EDUCATION

Ajay Kumar Garg Engineering College, Ghaziabad 2023 – 2027 (Expected)

Bachelor of Technology in Computer Science | CGPA: 8.7 / 10

PROJECTS

ExamShield AI – Proctored Exam Platform GitHub | Live demo

FastAPI, Python, MongoDB Atlas (Motor), JWT, Bcrypt, Pydantic, httpx, Gemini API, Pytest, React, TypeScript

- Built and deployed (Render) an async FastAPI and MongoDB backend with JWT authentication, Bcrypt hashing and role-based access; a partial unique index and atomic updates keep exam sessions concurrency-safe.
- Implemented an examiner review and appeal workflow with an audit history, per-user rate limiting, and aggregation pipelines that serve the dashboard in one request.
- Added background Gemini grading with retries, prompt-injection defences and server-side mark validation; wrote 115 automated tests (pytest, in-memory MongoDB).

Learnova – Learning Management System GitHub

Node.js, Express.js, MongoDB, React, Next.js, WebSocket, JWT, Bcrypt, AWS EC2

- Engineered 15+ RESTful endpoints with JWT authentication and a per-classroom role model (a user can be a teacher in one classroom and a student in another).
- Implemented real-time WebSocket messaging with sub-100ms latency; designed schemas managing 1K+ documents.
- Deployed the backend on AWS EC2 with PM2 and the frontend on Vercel.

Quiz Portal – Assessment Platform GitHub

Node.js, Express.js, MongoDB, EJS, AdminLTE, Express-Validator

- Developed automated grading for 400+ attempts with randomized questions and an admin dashboard for live monitoring.
- Reduced submission errors by 90% through frontend validation and backend sanitization.

PROFESSIONAL EXPERIENCE

Unfluke (Noida) | Backend Developer Intern March 2026 – May 2026

- Built and optimized RESTful APIs with Node.js and Express.js for production services.
- Worked with the engineering team on performance improvements and scalable architecture; tested APIs with Postman in agile sprints.

Team Conatus – Programming Club | Coordinator, Backend Developer Nov 2024 – Present

- Lead technical activities for a 45-member club; architected 3+ web applications using Node.js, Express.js and MongoDB.
- Reduced REST API response time by 25% through query optimization and caching.
- Mentor 10+ junior developers in Git workflows, API design, database modeling and authentication.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, Python, C/C++, SQL
Backend:	Node.js, Express.js, FastAPI, REST API Design, WebSocket, Middleware, MVC, Rate Limiting, Background Tasks
Databases:	MongoDB (Mongoose, Motor, Atlas), MySQL, Schema Design, Indexing, Aggregation Pipelines, Transactions
Security:	JWT, Bcrypt, OAuth 2.0, RBAC, Session Management, Input Validation, Prompt-Injection Defence
Testing & Tools:	Pytest, Postman, Git, GitHub, Docker, Linux, npm, VS Code
Cloud & Deployment:	AWS EC2, PM2, Render, Vercel
Frontend (working):	React, Next.js, TypeScript, Tailwind CSS, HTML5, CSS3

ACHIEVEMENTS & CODING PROFILES

- Conducted a Web Development Workshop for 80+ students covering Node.js, Express.js and MongoDB.
- Solved 250+ DSA problems | CodeChef: 2-star (max rating 1431) | Codeforces: max rating 882
